## 01. Introduction

On 4 September 2026, the Central Statistics Agency (***Badan Pusat Statistik*** – "**BPS**") issued Central Statistics Agency Regulation No. 6 of 2026 concerning Amendments to Central Statistics Agency Regulation No. 7 of 2025 concerning the Indonesian Standard Industrial Classification ("**BPS Regulation 6/2026**"), which came into effect on 10 September 2026.

BPS Regulation 6/2026 amends all annexes to Central Statistics Agency Regulation No. 7 of 2025 ("**BPS Regulation 7/2025**"). In general, these amendments do not materially alter the structure of the Indonesian Standard Industrial Classification of 2025 (*Klasifikasi Baku Lapangan Usaha Indonesia Tahun* 2025 - "**KBLI**") as set out in BPS Regulation 7/2025. However, several adjustments have been made to the classifications of the battery industry, particularly KBLI 27201 (Battery Manufacturing) and KBLI 27203 (Vehicle Battery and Large-Capacity Battery Energy Storage System (BESS) Manufacturing), as follows:

## 02. KBLI 27201 – Battery Manufacturing

- **Change in Terminology.** BPS Regulation 6/2026 changes the term "Batu Baterai" (dry-cell batteries) has been changed to "Baterai" (batteries) to align the terminology used in the business activity classification.
- **Adjustment to the Scope of Small-Capacity BESS**. The scope of business activities, which previously included the manufacture of battery-based energy storage systems ("**BESS**") for portable devices, such as mobile phones, tablets, and similar devices, including power banks, has been adjusted to cover the manufacture of power banks or BESS with a capacity of up to 30 (thirty) kWh.
- **Addition of Battery Types**. BPS Regulation 6/2026 specifically adds lithium batteries to the description of the business activity classification under KBLI 27201.

## 03. KBLI 27203 – Vehicle Battery and Large-Capacity Battery Energy Storage System (BESS)

- **Change of Title**. BPS Regulation 6/2026 changes the title of KBLI 27203 from "Electric Vehicle Battery Manufacturing" to "Vehicle Battery and Large-Capacity Battery Energy Storage System (BESS) Manufacturing."
- **Adjustment to the Scope of Electric Vehicle Batteries**. BPS Regulation 6/2026 adjusts the scope of battery types covered under KBLI 27203 to batteries for electric vehicles, without specifically mentioning batteries for electric bicycles.
- **Adjustment to the Scope of BESS**. BPS Regulation 6/2026 specifically stipulates that BESS classified under KBLI 27203 are BESS with a capacity of more than 30 (thirty) kWh. Meanwhile, BESS with a capacity of less than 30 (thirty) kWh are classified under KBLI 27201.
- **Expansion of the Types of Self-Manufactured Components**. BPS Regulation 6/2026 expands the description of self-manufactured components to include both cathodes and anodes manufactured in-house.

## 04 Conclusions

Overall, the amendments introduced under BPS Regulation 6/2026 do not materially alter the structure of the 2025 KBLI. Nevertheless, business actors operating in the battery industry should take note of these adjustments, particularly those relating to the scope of business activities under KBLI 27201 and KBLI 27203, and ensure that the KBLI classifications used are consistent with the latest classification and the business activities actually carried out.
